

### Abstract of the Disclosure

~~(57) Abstract: The invention relates to a~~ A flexible tubular pipe ~~[[ (1) ]]~~ for the transfer of fluid in a field of offshore petroleum development. ~~The invention pipe is of the type that consists of~~ includes from inside outward an impervious inner polymer sheath ~~[[ (3) ]]~~, one or more successive reinforcing layers comprising coils of reinforcing wires or metallic strips, or long composite elements ~~(4,5,6)~~, and at least one second polymer sheath, comprising at least one of such as an outer protective sheath ~~[[ (7) ]]~~ or an intermediate sheath ~~(8)~~. ~~Said pipe is characterized in that the~~. The second polymer sheath comprises an ~~(7, 8) is made from as~~ elastomeric thermoplastic polymer (TPE).
